Automotive and e-mobility, medical, household appliances and construction.

Unique Selling Points

- One-stop-shop: all metalworking and assembly under same roof
- Rigorous quality control
- Co-engineering and supply chain support
- State-of-the-art machine park
- Extensive storage capacity and just-in-time delivery
- Long-term partnerships
- Vertical integration
- Sustainability and social entrepreneurship

Services

- Advanced metalworking
- Manual assembly
- Total assembly from start to finish
- Co-engineering and supply chain support
- Can be combined with other activities, such as cable or plastic assembly

Metalworking techniques

Drilling, blending, cutting, sawing, (robot) welding, manual deburring, laser cutting, powder coating, pressing, punching ...

WAAK Metal Assembly from start to finish

From advanced metalworking to manual assembly

At WAAK, we can offer you a comprehensive **range of metalworking techniques**. We enhance these metalworking techniques with manual assembly to provide you with a convenient, **all-in-one solution**. We can manage part or even the entirety of your production chain—allowing you to focus on your core activities while we take care of the rest.

Achieving perfection through quality control

The quality of our work exceeds the industry's standards. Every step of the assembly process is carefully monitored using **advanced technologies**, from on-screen instructions to camera recognition and thorough sampling, testing and adjusting. We manufacture your product exactly as

you want it, with a commitment to excellence at every stage of the manufacturing process.

Co-engineering and supply chain support

At WAAK, we don't just handle production, we elevate it. Our experienced **co-engineering team** partners with you from the earliest stages, helping to design a LEAN, efficient assembly process, tailored to your needs. **From prototyping to process optimisation**, we help you maximise your product's performance and output.

And we even go beyond that. Our supply chain experts and LEAN specialists are happy to share their expertise to help you transform your production processes into a streamlined, highly efficient operation. In doing so, we make sure you get the greatest possible return on your investment!

Delivery reliability

We specialise in **just-in-time deliveries**, ensuring your deadlines are always met—never late, never too early. Thanks to our meticulous production planning and extensive storage capacity, we deliver with precision and reliability.

Long-term partnerships

We believe in **long-term collaborations** with our clients. These durable relationships enable us to provide a service that is perfectly tailored to your needs, offer greater technical expertise, and foster a strong overall commitment.
